**Summary of Interview**

Examiner Ouellette and the undersigned met for an in-person interview on September 8, 2005. The undersigned proposed language for adding to each of the independent claims. A copy of the proposed language is attached to the Examiner's Interview Summary. Examiner Ouellette suggested a modification to the proposed language and the Examiner and the undersigned agreed upon language to add to the independent claims to distinguish the cited Tuttle reference (U.S. Patent No. 6,127,917) by clarifying that no identification information is sent from the passenger to trigger the display of passenger-specific boarding information. Examiner Ouellette also recommended that Applicant clarify the source of the passenger-specific boarding information. These revisions are reflected in the following claim amendments.
